METRO COLOR RANGE

Our technical innovation and commitment to quality starts with the computerized stone-chip grading & blending process. Metro uses a finer, higher quality, Non-Oiled natural granite stone chip, which provides one of the tightest industry stone-coating matrixes available. The finished result is a stone-coated steel panel roof product that carries a long-life weather-proof warranty.

With a Metro roof overhead your home will be ready to withstand nature's toughest challenges.

Always select color from a Metro stone-coated steel sample or panel, as printed colors may vary. Colors are either solid or flashed to provide a variegated non-patterned appearance. Metro colors are available in either Standard, Premium, or Special color categories, depending on the panel profile chosen, confirm your selection prior to purchase.

* Metro COOL Colors have a Total Solar Reflectance of 20% or greater.

** Colors indicated are highly reflective and meet the minimum Energy Star® requirements of 25% for reflective roofing.
