UPDATED

New & Improved – ROMAN SR Tile Panel

Utilizing Metro’s world-wide resources has allowed us to launch new profiles quickly and efficiently. The Metro Roman Tile was no exception and we recently commissioned a new die-tool for our USA production needs to ensure strong supply for the coming years of this successful profile.

This new ‘Updated’ Roman Tool is virtually the same as the current tool but with some subtle enhancements that speed up production and enhance transit packaging protection, which dictate we assign a new part number as shown below. All other accessories remain the same.

Production of this part is expected to begin in early September 2007, so plan accordingly. The new part number is noted below.

ITEM	Old -PN-# - XX = Color	New - PN-# - XX = Color
UPDATED – Metro Roman SR Tile	1110-XX	1109-XX

Metro will carry a small quantity of the old Roman parts in standard colors as we transition to this new updated version. We can match or make-up inventory quantities to fulfill job lots as needed.

The updated version should not be mixed with current panels. Make sure you define which parts you need especially if you are matching to your inventory or for job-lots.
